PROFESSIONAL SUMMARY

My experience consists of building internal tool for an e-commerce company to speed up site management and product management across the whole company.

These internal tools include CMS, PIM and DAM.

I lead a team building these tools from the ground up, of which 2 were rebuilds, also focusing on improving UI and UX.

The future role I am looking for is a company who likes to innovate in web design, with a team that is also passionate about programming. Where I can share my knowledge about frontend development, UI/UX and continue to grow my skills.

SKILLS

HTML, CSS, Javascript/Typescript, React, Vue, MaterialUI, Nodejs, MongoDB, Docker

EXPERIENCE

Senior Frontend Developer, JDSports Fashion plc
11-02-2019 - present

- CMS: A custom built Content Management System where designers and content teams can create, update and schedule web pages seamlessly. Saving the business countless hours in website changes.
- PIM: A Product Information Management system custom built for on-boarding and managing products for multiple sources, countries and languages.
- DAM: A custom built Digital Asset Manager where the photography, content and design teams can upload, edit and assign images direct from the browser.

Software Test Consultant, Intelligent Delivery Solutions
07-12-2017 - 05-02-2019

- Bank of England: I wrote test cases and executed tests for the Bank of Englands internal software. Reporting bugs and issues.
- Slater+Gordon: Creating and testing internal tools such as client sign up portals.
- Apprenticeship: Whilst at Intelligent Delivery Solutions I completed a Software Development apprenticeship.
